

When does the AI result arrive?

Arrival of the AI result relative to the radiology report, by modality. Observational study, 20 centers, 21,872 exams with a linked report.

Overall, 7.2% of AI results arrived after the report was finalized, from 3.0% for knee MRI to 13.2% for chest CT; CT and MRI results arrived during or after finalization more often than radiography (29.6% vs 13.6%).

Morozov S, Heracleous N, Novarina O, Korka D, Dufour B, Thouly C, Rizk B. AI Latency, Report Turnaround Time, and Adoption in a Multi-Vendor AI Ecosystem: A Multi-Site Observational Study. J Am Coll Radiol. 2026. doi:10.1016/j.jacr.2026.09.026

Multi-vendor AI in radiology practice

Observational study, 20 centers, 4.5 years, ~389,000 AI-processed exams

91%

of radiologists use AI actively

72%

of AI delay is data routing, not the algorithm

7.2%

of AI results arrive after the report is signed

-26%

report time in trauma radiography with AI (radiologist-adjusted)

Associations from an observational study, not causal effects.

Morozov S, Heracleous N, Novarina O, Korka D, Dufour B, Thouly C, Rizk B. AI Latency, Report Turnaround Time, and Adoption in a Multi-Vendor AI Ecosystem: A Multi-Site Observational Study. J Am Coll Radiol. 2026. doi:10.1016/j.jacr.2026.09.026

Monitoring deployed AI: three layers

What was measured across 20 centers over 4.5 years, and the loop that acts on it. Observational study.

1 Machine time

- Total latency, image to AI result
- Data routing vs AI processing
- Quarterly drift per solution

In this study

Median 2.06 min [IQR 1.74-3.05]; 72% was data routing; five of nine solutions steady quarter to quarter

2 Workflow time

- AI arrival vs report start and sign-off
- "Too Late" rate by modality
- Report time with vs without AI

In this study

7.2% Too Late overall; -26% report time in trauma radiography and -18% in knee MRI (radiologist-adjusted, associations)

3 Radiologist perception

- Trust, quality, productivity (1 to 5)
- Net Promoter Score
- Survey radiologists on a fixed schedule (this study: two waves in 2025)

In this study

91.4% active adoption (53/58); perceived productivity 2.94/5, below neutral

Plan

Set time-to-display targets before go-live

Do

Push AI results automatically into the reading workflow

Check

Monitor latency, drift and radiologist scores on a fixed schedule

Act

Fix routing; retire tools that underperform

Morozov S, Heracleous N, Novarina O, Korka D, Dufour B, Thouly C, Rizk B. AI Latency, Report Turnaround Time, and Adoption in a Multi-Vendor AI Ecosystem: A Multi-Site Observational Study. J Am Coll Radiol. 2026. doi:10.1016/j.jacr.2026.09.026
